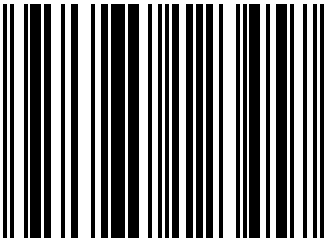
Fitting barcodes

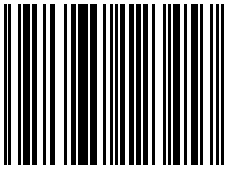
A barcode keeps its proportions. One size sets the other.

One size given

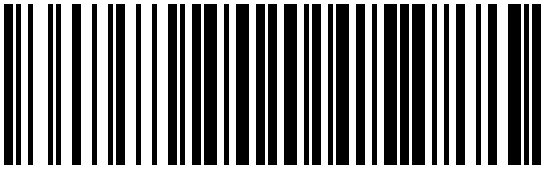
EAN-13, width 120pt



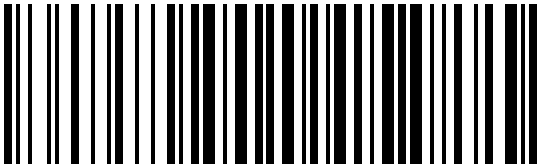
EAN-13, height 60pt



Code 128, height 60pt

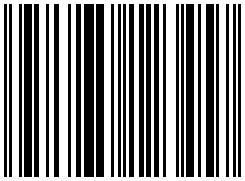


Code 128, width 200pt



QR code, height 60pt

No size: the standard EAN-13



Both given: a maximum

Each barcode takes the largest size that fits in a 150 × 70pt slot. A frame of that size centres it.

The parent's align places it
