Lpdf

Frame

Single-child container — constrains child to frame width and always centers it horizontally and vertically

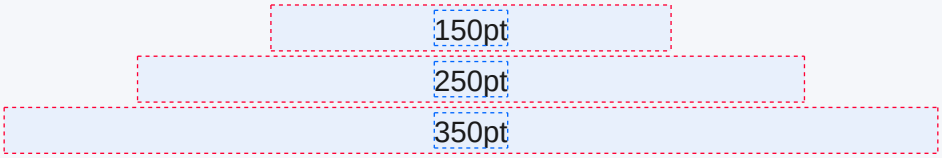
width

no width — frame fills its parent like a stack

width="200pt" — centered in parent

width="300pt" — centered in parent

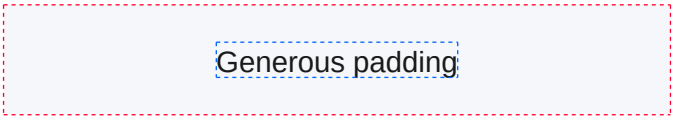
multiple frames at different widths



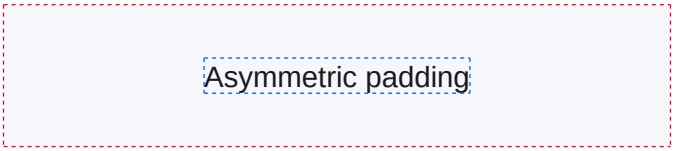
padding

padding="xs"

padding="l"

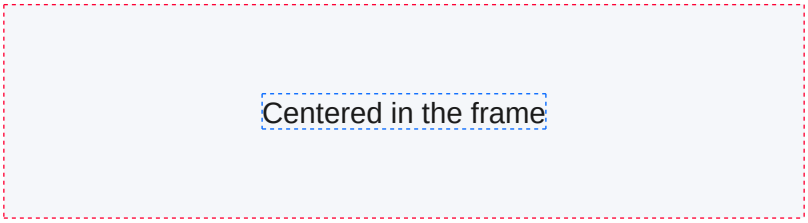


padding="20pt 8pt" (vertical · horizontal)



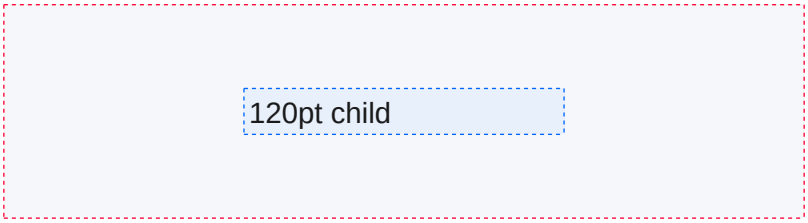
fixed height · centering

height="80pt" — short child is centered vertically and horizontally (no attrs needed)

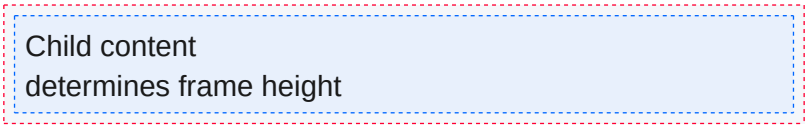


height="80pt" — child narrower than frame: width="120pt" stack centered horizontally

Lpdf



no height — frame grows to fit its child (centering is still horizontal)



border · radius

border="xs rule" radius="xs"

Subtle card

border="s primary" radius="l"

Bold rounded border

background="accent" radius="m" padding="m"

Filled background with radius
