Annual Report

This report is tagged for assistive technology: a screen reader announces its headings, reads its tables cell by cell with their headers, and skips the page furniture. The figures come from the quarterly returns[1], and the method is on the project's site.

Highlights

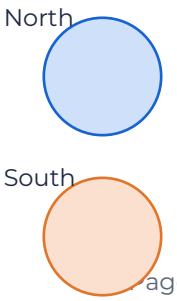

1. Units grew in every quarter.
2. Two regions reported:
   - North, with both quarters.
   - South, with the first quarter only.

Units by quarter

Region	Q1	Q2
North	1,204	1,388
	1,150	1,302
South	No figures for the second quarter yet	

Go to the details

[1] The returns of the four regions, as filed at the end of each quarter.

Details

How the figures were counted

Each region counts the units it shipped in the quarter, and the totals are checked against the invoices before they are filed. A region that has not filed shows no figure.

Lpdf

Notes from Markdown

A paragraph with strong words, written in Markdown and tagged as the rest is, and a link that wraps onto the next line: the method of the report, with the steps of each count, the returns of every region as they were filed, and the checks made against the invoices of each quarter.
