Heights inside a link

A link at the top of the page, holding a block of full height

The link's line of text

This line follows the link.

A link in a column, holding a block of full height

The link's line of text

This line follows the link, inside the column.

A link in a row of 40pt, beside a text of fill width

The link's line

Beside the link

This line follows the row.

A link of 40pt as a grid cell, beside a column of 40pt and a taller cell

Link, 40pt

Column, 40pt

The row is as tall as this cell, which holds a text long enough to take several lines in a third of the page. The two boxes beside it keep to their own 40pt.

This line follows the grid.

Links that fill: of full height, and of fill height under a line

The link's line, the link of full height

A line above the link of fill height

This line follows the links that fill.

A link as a grid cell, stretched to its row

The link's line

The row is as tall as this cell, which holds a text long enough to take several lines in half of the page. The grid stretches the link beside it to the row, and the link's block takes what its line leaves.

This line follows the grid.
