Spring Collection

Made for the press: CMYK where it was given, RGB tied to sRGB, every font embedded.

The cyan band and the paper tone are process colors, cmyk() as the printer separates them. The headings, the photo and the chart are RGB, which the file maps to sRGB, so the press profile converts them the same way on any RIP. The page runs 3mm past its trim on every side, so the band and the paper tone reach the edge of the sheet after it is cut.
