Section 1 1

Section 1 2

Paragraph 3. The layout engine processes each node in the document tree, computing sizes and positions. Each text node is measured using font advance-width tables and line-breaking rules applied to the available width.

Paragraph 4. The layout engine processes each node in the document tree, computing sizes and positions. Each text node is measured using font advance-width tables and line-breaking rules applied to the available width.

Paragraph 5. The layout engine processes each node in the document tree, computing sizes and positions. Each text node is measured using font advance-width tables and line-breaking rules applied to the available width.

Field 6	Value 6
Field 7	Value 7

Callout 8
This callout box highlights item 8 in the document flow and exercises background, border, padding, and radius rendering in the layout engine.

Section 2 9

Paragraph 10. The layout engine processes each node in the document tree, computing sizes and positions. Each text node is measured using font advance-width tables and line-breaking rules applied to the available width.

Paragraph 11. The layout engine processes each node in the document tree, computing sizes and positions. Each text node is measured using font advance-width tables and line-breaking rules applied to the available width.

Paragraph 12. The layout engine processes each node in the document tree, computing sizes and positions. Each text node is measured using font advance-width tables and line-breaking rules applied to the available width.

Section 2 13

Section 1 14

Paragraph 15. The layout engine processes each node in the document tree, computing sizes and positions. Each text node is measured using font advance-width tables and line-breaking rules applied to the available width.

Paragraph 16. The layout engine processes each node in the document tree, computing sizes and positions. Each text node is measured using font advance-width tables and line-breaking rules applied to the available width.

Paragraph 17. The layout engine processes each node in the document tree, computing sizes and positions. Each text node is measured using font advance-width tables and line-breaking rules applied to the available width.

Field 18	Value 18
Field 19	Value 19

Callout 20
This callout box highlights item 20 in the document flow and exercises background, border, padding, and radius rendering in the layout engine.

Section 2 21

Paragraph 22. The layout engine processes each node in the document tree, computing sizes and positions. Each text node is measured using font advance-width tables and line-breaking rules applied to the available width.

Paragraph 23. The layout engine processes each node in the document tree, computing sizes and positions. Each text node is measured using font advance-width tables and line-breaking rules applied to the available width.

Paragraph 24. The layout engine processes each node in the document tree, computing sizes and positions. Each text node is measured using font advance-width tables and line-breaking rules applied to the available width.

Section 3 25

Section 1 26

Paragraph 27. The layout engine processes each node in the document tree, computing sizes and positions. Each text node is measured using font advance-width tables and line-breaking rules applied to the available width.

Paragraph 28. The layout engine processes each node in the document tree, computing sizes and positions. Each text node is measured using font advance-width tables and line-breaking rules applied to the available width.

Paragraph 29. The layout engine processes each node in the document tree, computing sizes and positions. Each text node is measured using font advance-width tables and line-breaking rules applied to the available width.

Field 30	Value 30
Field 31	Value 31

Callout 32
This callout box highlights item 32 in the document flow and exercises background, border, padding, and radius rendering in the layout engine.

Section 2 33

Paragraph 34. The layout engine processes each node in the document tree, computing sizes and positions. Each text node is measured using font advance-width tables and line-breaking rules applied to the available width.

Paragraph 35. The layout engine processes each node in the document tree, computing sizes and positions. Each text node is measured using font advance-width tables and line-breaking rules applied to the available width.

Paragraph 36. The layout engine processes each node in the document tree, computing sizes and positions. Each text node is measured using font advance-width tables and line-breaking rules applied to the available width.

Section 4 37

Section 1 38

Paragraph 39. The layout engine processes each node in the document tree, computing sizes and positions. Each text node is measured using font advance-width tables and line-breaking rules applied to the available width.

Paragraph 40. The layout engine processes each node in the document tree, computing sizes and positions. Each text node is measured using font advance-width tables and line-breaking rules applied to the available width.

Paragraph 41. The layout engine processes each node in the document tree, computing sizes and positions. Each text node is measured using font advance-width tables and line-breaking rules applied to the available width.

Field 42	Value 42
Field 43	Value 43

Callout 44
This callout box highlights item 44 in the document flow and exercises background, border, padding, and radius rendering in the layout engine.

Section 2 45

Paragraph 46. The layout engine processes each node in the document tree, computing sizes and positions. Each text node is measured using font advance-width tables and line-breaking rules applied to the available width.

Paragraph 47. The layout engine processes each node in the document tree, computing sizes and positions. Each text node is measured using font advance-width tables and line-breaking rules applied to the available width.

Paragraph 48. The layout engine processes each node in the document tree, computing sizes and positions. Each text node is measured using font advance-width tables and line-breaking rules applied to the available width.
