Made with Lpdf

Lists

Bullets and numbers that the engine writes, nested to any depth.

Bullets by depth

- A disc at the top level.
- A circle one level down.
  - The first item of the circle list.
  - A square one level further.
    - The first item of the square list.
    - The second item of the square list.
- Numbers inside a bullet list do not count as a level.
  1. The first number.
     - A circle: the numbers between do not count.
  2. The second number.

A bullet of your choice

- A dash.
- Another dash.

- A square at the top level.
- Another square.

- A circle at the top level.
- Another circle.

Numbers

1. Decimal, which is the default.
2. The second item, long enough to wrap onto a second line, where it stays under the words and not under the number.
3. The third.

a) Letters, with a bracket after them.
b) The second letter.
c) The third letter.

(A) Capitals in brackets, in a small blue list.
(B) The second one, in the same color.

iii. Numerals, from three.
iv. Four.
v. Five.

VIII. Eight: a number of more than one letter needs a wider indent, and ends where the others do.
IX. Nine.
X. Ten.

Clauses

1. The supplier delivers the goods to the address in the order.
   (a) Delivery takes place on a weekday between nine and five.
   (b) The buyer signs for the goods, and the supplier may refuse delivery when:
      (i) nobody is at the address to sign, or
      (ii) the person who signs is not of age.
2. Risk passes to the buyer on delivery.

Made with Lpdf

3. The buyer pays within thirty days of the invoice.

An item that is a box

- **A tinted item.**
  A second paragraph in the same item, under the first, with the marker beside the first line only.
  - A list inside the item.

- An item with no box.

A wide indent and a wide gap

1. The words start 48pt from the left edge.

2. And 12pt below the item before.
