Row: between

justify="between" spreads a line from edge to edge; two fill children share it in halves

justify="between"

each child keeps its natural width, the first at the left edge and the last at the right

Left Right

first child width="120pt", second its natural width

Fixed 120pt Natural

second child width="100pt", first its natural width

Natural Fixed 100pt

three children — the middle one evenly between

Left Middle Right

width="fill" on both children

the two children share the width in halves; the sections below use them too

Left column — equal width | Right column — equal width
