Section 1 1

Section 1 2

Paragraph 3. The layout engine processes each node in the document tree, computing sizes and positions. Each text node is measured using font advance-width tables and line-breaking rules applied to the available width.

Paragraph 4. The layout engine processes each node in the document tree, computing sizes and positions. Each text node is measured using font advance-width tables and line-breaking rules applied to the available width.

Paragraph 5. The layout engine processes each node in the document tree, computing sizes and positions. Each text node is measured using font advance-width tables and line-breaking rules applied to the available width.

Section 2 6

Paragraph 7. The layout engine processes each node in the document tree, computing sizes and positions. Each text node is measured using font advance-width tables and line-breaking rules applied to the available width.

Paragraph 8. The layout engine processes each node in the document tree, computing sizes and positions. Each text node is measured using font advance-width tables and line-breaking rules applied to the available width.

Paragraph 9. The layout engine processes each node in the document tree, computing sizes and positions. Each text node is measured using font advance-width tables and line-breaking rules applied to the available width.

Section 3 10

Paragraph 11. The layout engine processes each node in the document tree, computing sizes and positions. Each text node is measured using font advance-width tables and line-breaking rules applied to the available width.

Paragraph 12. The layout engine processes each node in the document tree, computing sizes and positions. Each text node is measured using font advance-width tables and line-breaking rules applied to the available width.

Paragraph 13. The layout engine processes each node in the document tree, computing sizes and positions. Each text node is measured using font advance-width tables and line-breaking rules applied to the available width.
