Made with Lpdf

# Image box

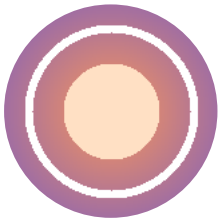
Room, a background, a border and rounded corners around a picture.

## Radius

No attributes

radius="m"

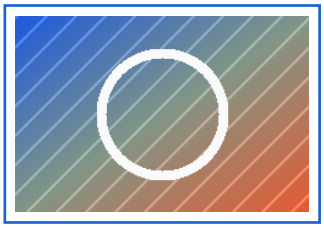
radius="xxl"



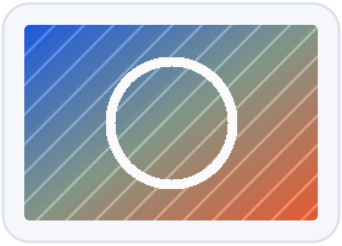
A circle: radius 40pt on 80pt

## Padding, background and border

padding and background



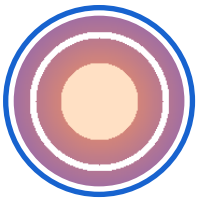
padding and border



all four, radius="l"

The box is larger than the picture by the padding. The border takes no room: it is drawn on the edge of the box.

## In a row and a table



**Avatar and name**

A round picture in a ring: radius 35pt on a 64pt picture and 3pt of padding.

| | |
|---|---|
|  | An image in a table cell keeps its box. |
| | And a rounded one without a box. |
