

# Frame

Single-child container — constrains child to frame width and always centers it horizontally and vertically

## width

no width — frame fills its parent like a stack

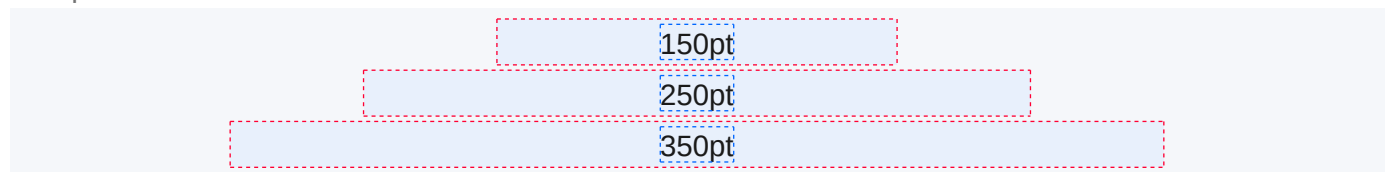

width="200pt" — centered in parent

width="300pt" — centered in parent

multiple frames at different widths

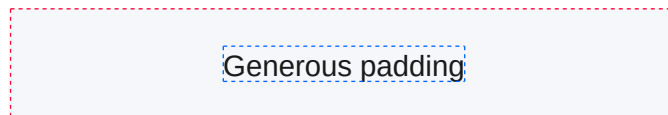

## padding

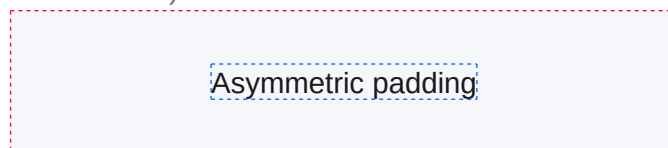

padding="xs"

padding="l"

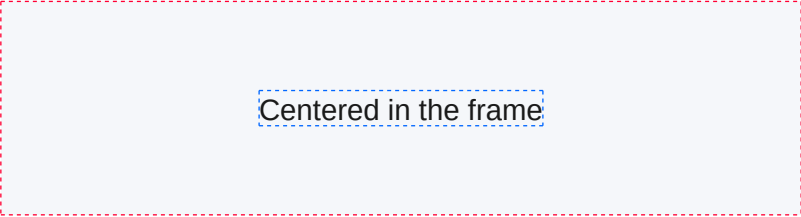

padding="20pt 8pt" (vertical · horizontal)

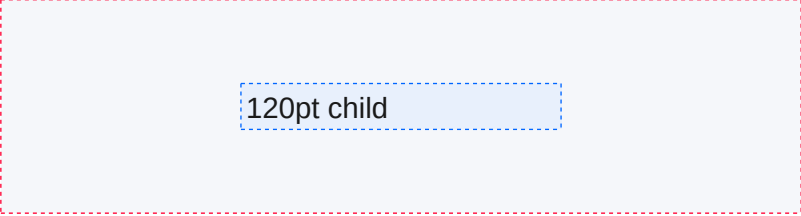

## fixed height · centering

height="80pt" — short child is centered vertically and horizontally (no attrs needed)

A light blue rectangular frame with a red dashed border. Inside the frame, the text "Centered in the frame" is centered both horizontally and vertically. The text itself is enclosed in a blue dashed border.

Centered in the frame

height="80pt" — child narrower than frame: width="120pt" stack centered horizontally

A light blue rectangular frame with a red dashed border. Inside the frame, a smaller light blue rectangle is centered horizontally. This inner rectangle contains the text "120pt child" and is outlined with a blue dashed border.

120pt child

no height — frame grows to fit its child (centering is still horizontal)

A light blue rectangular frame with a red dashed border. The frame's height is determined by the text inside. The text "Child content determines frame height" is centered horizontally and is enclosed in a blue dashed border.

Child content  
determines frame height

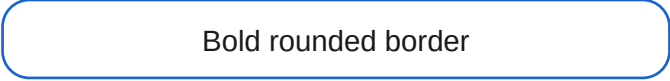

## border · radius

border="xs rule" radius="xs"

A light blue rounded rectangle with a thin, light blue border and small radius. The text "Subtle card" is centered inside.

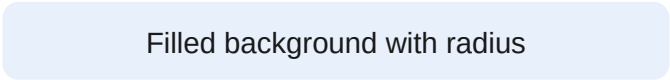

Subtle card

border="s primary" radius="l"

A light blue rounded rectangle with a thick, dark blue border and a large radius. The text "Bold rounded border" is centered inside.

Bold rounded border

background="accent" radius="m" padding="m"

A solid light blue rounded rectangle with a medium radius and padding. The text "Filled background with radius" is centered inside.

Filled background with radius
