Ruling

squares: step="5mm" and nothing else. Lines every 5mm in both directions, from the top left corner of the page to its edges, in line-muted at 0.4pt.

Ruled paper

ruled: step-y="8mm" with edges="false". Lines across the page only, the first 8mm down, none on the top edge.

A step in each direction

form: step-x="10mm" step-y="6mm" with origin="margin". The lines start at the top left corner inside the margin, stop at its edges, and leave what is over at the right and the bottom.

Lpdf

A count

twelve: count-x="12" count-y="16" with origin="margin". The area inside the margin cut into 12 columns and 16 rows, with lines on all four edges.

Lpdf

Graph paper

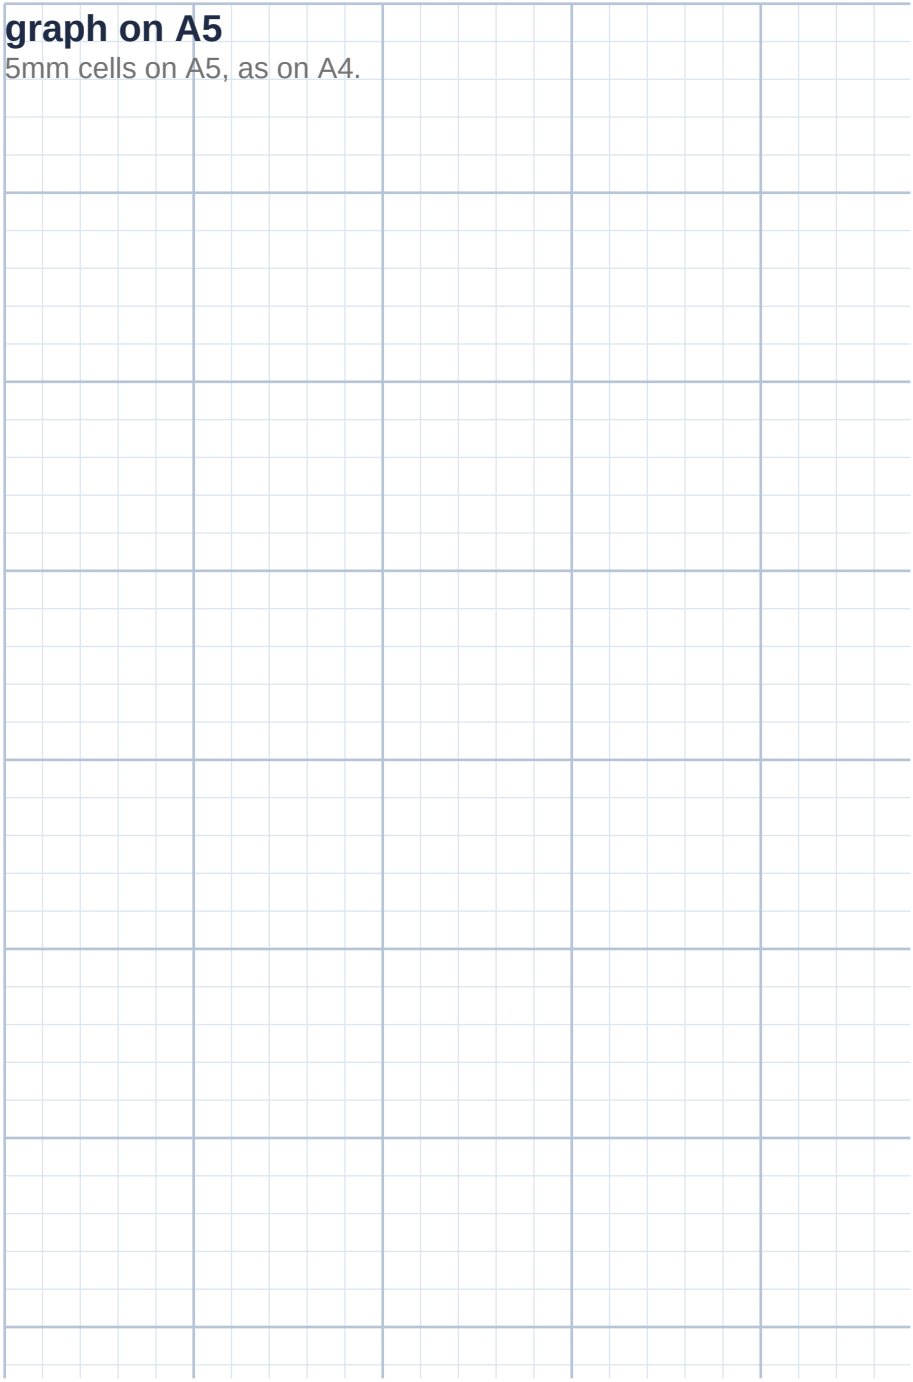
graph: a fine set every 5mm in paper-fine at xs, and a heavier one every 25mm in paper-bold at s, drawn after it, inside a margin of 40pt.

Lpdf

twelve on A5

12 narrower columns across A5 than across A4.

Lpdf

graph on A5


5mm cells on A5, as on A4.
